WHO: Corruption and Conflict of Interest?

Table 1. Comparison of the Programme budget 2016–2017 and the Proposed programme budget 2018–2019 (US\$ million)

Categories	Approved Programme budget 2016–2017 ^a	Proposed programme budget 2018–2019	Difference between 2016–2017 and proposed 2018–2019
1 – Communicable diseases	783.5	805.4	21.9
2 – Noncommunicable diseases	376.0	351.4	-24.6
3 – Promoting health through the life course	381.7	384.3	2.6
4 – Health systems	594.5	589.5	-5.0
E – WHO Health Emergencies Programme	485.1	554.2	69.1
6 – Corporate services/enabling functions	733.5	715.5	-18.0
Subtotal base programmes	3 354.3	3 400.3	46.0
Polio and special programmes	986.1	1 021.2	35.1
Total	4 340.4	4 421.5	81.1

^a Showing the budget increase for the WHO Health Emergencies Programme approved in decision WHA69(9) (2016).

The WHO has a plan

Decade of Vaccines

Magdalena Robert

Phone: +34 93 227 1806

The Council comprises of the Director-General of the WHO, the Director of NIAID, the Director of UNICEF, the President of Gates Foundation Global Health, and the Chair of the African Malaria Alliance

NEW YORK -- The [World Health Organization \(WHO\)](#), [UNICEF](#), the [National Institute of Allergy and Infectious Diseases \(NIAID\)](#) and the Bill & Melinda Gates Foundation have announced a collaboration to increase coordination across the international vaccine community and create a Global Vaccine Action Plan. This plan will build on the successes of current work to achieve key milestones in the discovery, development and delivery of lifesaving vaccines to the most vulnerable populations in the poorest countries over the next decade.

Global Vaccine Action Plan publication

The Global Vaccine Action Plan (GVAP) — endorsed by the 194 Member States of the World Health Assembly in May 2012 — is a framework to prevent millions of deaths by 2020 through more equitable access to existing vaccines for people in all communities.

GVAP was the product of the DoV Collaboration, an unprecedented effort that brought together development, health and immunization experts and stakeholders. **The leadership of the Bill & Melinda Gates Foundation, GAVI Alliance, UNICEF, United States National Institute of Allergies and Infectious Diseases and WHO,** along with all partners – governments and elected officials, health professionals, academia, manufacturers, global agencies, development partners, civil society, media and the private sector – are committed to achieving the ambitious goals of the GVAP. Many more are expected to add their support in the future as the plan is translated and implemented at the country and regional levels.

Whistleblower exposes the corruption of the WHO, Bill Gates and GAVI

Dr Astrid Stuckelberger
WHO Insider and Whistleblower

- WHO has been infiltrated by big players, with major conflict of interest like GAVI, Gates Foundation
- GAVI operates like a Vaccine Cartel, controlling the coronavirus response of nations. They have ‘Total Immunity’ from prosecution.
- Bill Gates funded GAVI (Global Alliance for Vaccines and Immunisation) has created a system called “Performance based funding” whereby they financially punish nations based on their compliance or non-compliance to vaccination programs.
- World Bank and GAVI (BMGF funded) created the IFFIM International Financial Facility for Immunization. They have an agreement that GAVI receives money from countries. GAVI dictates vaccine policies for countries and countries pay them – HUGE CONFLICT OF INTEREST

Whistleblower exposes WHO Corruption

The WHO as a corporate agency by its constitution can direct governments, their health ministries, as a legal obligation to implement international health regulations as directed by the WHO.

WHO has become a health dictatorship, where the Director-General on his own can decide to sell vaccines, sell the PCR

If Tedros (WHO Director-General) decrees something, all the countries have to obey under law.

In 2017, Bill Gates requested to be part of the executive board of the WHO, like a member state. They even put it to a vote that he be recognised as a member state, which is unprecedented in the constitution.

Swiss Medic (FDA equivalent in Switzerland) have signed an agreement with Bill Gates in collaboration with WHO. I suspect every country has signed similar agreements

Dr Astrid Stuckelberger
WHO Insider and Whistleblower

Gates Foundation funding/investment in Covid Vaccine Candidates: Conflicts of Interest

Company	Covid Vaccine Candidate	Type	Value Investment (US\$)
Pfizer/BioNTech	BNT162b2 mRNA	To develop mRNA-based vaccines for infectious diseases	\$27,5 million (July 2022) \$100 million (May 2022) \$4,918,943 (BioNTech 2020) \$17,252,854 (2016)

Treachery: Vaccine Hesitancy

Home / Newsroom / Feature stories / Ten threats to global health in 2019

WHO identifies

Ten threats to global health in 2019

Vaccine hesitancy – the reluctance or refusal to vaccinate despite the availability of vaccines – threatens to reverse progress made in tackling vaccine-preventable diseases. Vaccination is one of the most cost-effective ways of avoiding disease – it currently prevents 2-3 million deaths a year, and a further 1.5 million could be avoided if global coverage of vaccinations improved.

What the WHO failed to mention, however, is the preponderant role of “commercial interests”—and especially pharmaceutical industry interests—in shaping its goals and strategies.

Rather than focusing on strengthening health care in poor countries – that would help to contain future outbreaks like the Ebola, Covid pandemics – the WHO spends a disproportionate amount of its resources on projects with the measurable outcomes which benefits the Gates Foundation.

**WHO's financial contracts are secret
and not open to public scrutiny**

“No one should be on a committee developing guidelines if they have links to companies that either produce a product — vaccine or drug — or a medical device or test for a disease. It would be preferable that there are no financial ties when it comes to making big decisions on public health—for example, stockpiling a drug—and that includes if they have a currently funded clinical trial.”
